PROFESSIONAL SUMMARY

Management Information Systems graduate from King Abdulaziz University with four months of cooperative training experience at Saudi Aramco. Hands-on experience in Excel-based tracking and reporting, data organization, process analysis, documentation, stakeholder communication, and Power BI dashboard development. Experienced in supporting cross-functional activities, maintaining accurate records, and translating operational data into clear reports and dashboards. Detail-oriented, adaptable, and eager to contribute to business, analytical, and operational functions within a professional environment.

EDUCATION

King Abdulaziz University — Jeddah, Saudi Arabia | Bachelor of Business, Management Information Systems

2025 | GPA: 4.25/5.00

EXPERIENCE

Saudi Aramco | MIS Co-op Trainee – HR, Leadership Development

University Internship Program (UIP) | September 2024 – January 2025

- Managed 40+ recurring Completion Participant Records (PCRs), consolidating participant and feedback data from multiple Excel sources.
- Prepared 8+ weekly Learning Opportunity Indicators (LOIs) reports by extracting, cleaning, organizing, and summarizing enrollment data using Excel PivotTables.
- Developed an interactive Power BI dashboard from a complex 2024 operational plan Excel file to support data visualization and reporting.
- Maintained Excel-based course and participant records, supporting recurring reporting, data accuracy, and timely completion of course-related processes.
- Participated in 8+ bi-weekly group meetings and 4 monthly team meetings, gaining exposure to project updates, decision-making, and cross-functional coordination.
- Supported a two-week competency conference serving 100+ participants daily through participant registration and Excel-based tracking.
- Led icebreakers and safety moments during group meetings, strengthening presentation and professional communication skills.
- Maintained division telephone directories, organizational records, knowledge-sharing communications, and employee announcements with strong attention to detail.

PROJECTS

Heart Disease Analytics | Power BI, Microsoft Excel

- Cleaned and analyzed data and developed an interactive Power BI dashboard.
- Analyzed KPIs and trends to support data-driven insights.

Iluso Cafe | BPMN, Lucidchart

- Modeled As-Is and To-Be business processes to understand workflows and identify process bottlenecks.
- Analyzed process gaps and proposed improvement opportunities to support more efficient business operations.
